ComputerXplorers
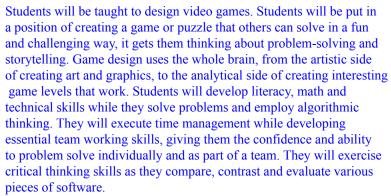

ComputerXplorers are offering innovative & creative Computing After School Club for Year 3-6 in January 2026 at **Courthouse Junior School.**

Game Design Club

(£151.80 for 11)

Students will be taught to design video games. Students will be put in a position of creating a game or puzzle that others can solve in a fun and challenging way, it gets them thinking about problem-solving and storytelling. Game design uses the whole brain, from the artistic side of creating art and graphics, to the analytical side of creating interesting game levels that work. Students will develop literacy, math and technical skills while they solve problems and employ algorithmic thinking. They will execute time management while developing essential team working skills, giving them the confidence and ability to problem solve individually and as part of a team. They will exercise critical thinking skills as they compare, contrast and evaluate various pieces of software.
Come and have fun in our Video Game Design Club!

'The day is rapidly approaching when the primary discriminator between the haves and have-nots will be the division between those who understand technology and those who do not. It will not be age, sex, colour, or culture—it will be technology.'

Dan Golden, Former Director of NASA

So come and join the Excitement… Don't miss the FUN… Limited seats only!!!

Yes, I would like to join the ComputerXplorers Coding Club in January 2026
